CS-Studio at NSLS2

Thursday 22 September 2016 09:50 (10 minutes)

There were 2 major developments associated with cs-studio at nsls2. Firstly the users are recognizing the befits of the integrated environment provided by CS-Studio and requesting for new applications to be developed which exploit the cs-studio framework. Secondly, with the cs-studio 4.3.3 release and the ability to save and load perspectives, users are now able to put together dedicated perspectives for various activities and workflows.
