# Dectris Eiger Specs

- Eiger 1M: 1030x1065 @ 3 kHz
  - Eiger 4M: 2070x2167 @ 750 Hz
  - Eiger 9M: 3110x3269 @ 238 Hz
  - Eiger 16M: 4150x4371 @ 133 Hz
- 
- All of them saturate a 10Gbps link:
    - That's a lot of data!

# Data Sources

There are three ways of getting data out of the detector:

- FileWriter API
- Stream API
- Monitor API

# FileWriter API

- Generates HDF5 files
- Available via HTTP
- HDF5 files have **mandatory** (and huge) headers: pixel mask, flatfield, etc are always included.
- Lossless: files are stored on detector's disk
- Not “real time”: each HDF5 container typically has more than one frame: driver has to wait N frames before pulling a file

# Stream API

- ZeroMQ stream of frames: PUSH socket
- Fast, “real time”
- Optional headers
- No frame bundling
- Potential frame loss if the client isn't fast enough pulling data

# Monitor API

- TIFF frames, available through HTTP
- Slow (< 10Hz)
- Useful for checking the state of the experiment without tapping into the main data stream

# And nothing else

- Detector server is a black box – no access other than REST/Stream APIs

# The ADEiger driver

- Supports all three APIs:
  - (filewriter || stream) && monitor
- Supports using none of the APIs:
  - Use the driver only to control the detector, don't touch the data
- Pipelined, multithreaded architecture

## Eiger Detector Control – XF:17IDC-ES:FMX{Det:Eig16M}cam1:

## Info

Asyn port	EIG
EPICS name	XF:17IDC-ES:FMX{
Manufacturer	Dectris
Model	Eiger 16M
Firmware Version	1.6.4
Serial Number	E-32-0101
Size	4150 4371
Connected	<input checked="" type="checkbox"/>
<input type="button" value="Connect"/> <input type="button" value="Disconnect"/>	

## Plugins

<input type="button" value="File"/>	<input type="button" value="ROI"/>
<input type="button" value="Statistics"/>	<input type="button" value="Other"/>

## Detector Status

Status Update	5 second
Temperature	24.5 C
Humidity	1.7 %
Links	<input checked="" type="checkbox"/> <input checked="" type="checkbox"/> <input checked="" type="checkbox"/> <input checked="" type="checkbox"/>
State	idle
DCU Buffer Free	100.0 %
Error parameters	[ ]

## Shutter

Shutter Mode	None
Status	Closed
EPICS Status	Closed
<input type="button" value="Open"/>	<input type="button" value="Close"/>
Delay Open	0.000
Delay Close	0.000
<input type="button" value="EPICS Shutter Setup"/>	

## Acquisition Parameters

Threshold	4500.000 eV	4500.000 eV
Photon Energy	9000.000 eV	9000.000 eV
Exposure Time	0.04999	0.04999
Acquire Period	0.05000	0.05000
# Images	7	7
# Triggers	1	1
Flatfield Correct	Enabled	Enabled
Trigger Mode	Internal Seri	Internal Series

## Acquire

<input type="button" value="Start"/>	<input type="button" value="Stop"/>	<input type="button" value="Trigger"/>
Data Source	None	None
Acquire Status	Done	<input checked="" type="checkbox"/>
Armed		<input checked="" type="checkbox"/>
Image Counter	0	0
Image Rate		0.00 Hz
Array Callbacks	Enable	Enable
Trigger Exposure	0.000000 s	0.000000 s
Manual Trigger	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>

## Driver Status

Waiting for acquire command
-----------------------------

## MX Metadata

	Angle Start		Angle Increment	
Chi	0.000 deg	0.000 deg	0.000 deg	0.000 deg
Kappa	0.000 deg	0.000 deg	0.000 deg	0.000 deg
Omega	-19.550 deg	-19.550 deg	0.050 deg	0.050 deg
Phi	0.000 deg	0.000 deg	0.000 deg	0.000 deg
Two Theta	0.000 deg	0.000 deg	0.000 deg	0.000 deg

## Monitor

Enable	<input type="checkbox"/>	<input checked="" type="checkbox"/>
Polling Period	0.1 s	0.1 s

## Stream

Enable	<input type="checkbox"/>	<input checked="" type="checkbox"/>
Dropped Frames		0

## FileWriter

Enable	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
Compression	Enabled	Enabled
# Images / File	200	200
Name Pattern	XtalSamp 3 10	XtalSamp_3_10_F
Sequence ID		48
Auto Remove	Yes	Yes
Save Files Locally	Yes	Yes
Path	/GPFS/	<input checked="" type="checkbox"/>
Det. Free Space	177542640 kB	
<input type="button" value="Remove Files on Detector"/>		

## Metadata

Beam Center X	2012.000 pixels	2012.000 pixels
Beam Center Y	2420.000 pixels	2420.000 pixels
Wavelength	1.3772 Angstro	1.3772 Angstro
Detector Distance	0.209 m	0.209 m
