Department of Energy

Accelerator Safety Workshop

September 10–12, 2019
Oak Ridge National Laboratory
Oak Ridge, TN

<https://conference.sns.gov/e/asw2019>

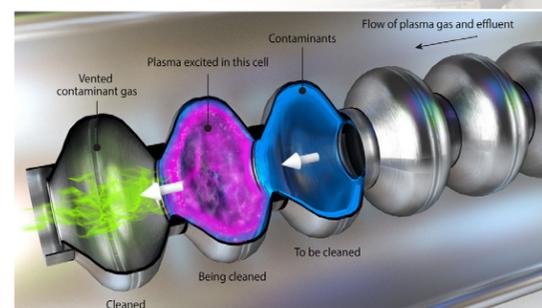

The workshop is an open forum for individuals affiliated with the United States Department of Energy or international accelerator facilities where each organization can present information/experiences on key operational and safety themes and share lessons learned.

Topics Include:

- Historical basis for the ASO, Guide and Tech Standard
- Readiness for Operations: ARR Process and ARR Experience
- Accelerator Safety Program Management: Contractor Assurance Processes and Program Review
- Accelerator Operations Experience
- Hazard Assessment and Management Methodology
- Environmental Issues
- New Frontiers, Broader Horizons: the Future of Accelerators and Accelerator Technology
- Safety Instrumented Systems: Standards, Software, Hardware, QA, Cybersecurity
- Configuration Management and QA
