

Questionnaire: Scientific Opportunities Provided by the Neutron Electrostatic Levitator (NESL)

Please consider the following questions before the afternoon Panel Discussion (completed questionnaires will be collected by the discussion leader so please be sure to make a copy for your own records). Feel free to elaborate as much as you want. You are also welcome complete more than one worksheet.

1. **Briefly describe your research interests and reasons for attending this workshop.**
2. **How could the capabilities of the NESL impact your research program?**
3. **What neutron scattering techniques would you like to use with the NESL?**
4. **Are there any specific capabilities that you would require from the NESL?** This may include temperature range, sample sizes or geometries, performance parameters, etc.
5. **What additional resources might you need to fully utilize the capabilities of the NESL?** This may include sample preparation or characterization, software, experiment support, etc.
