Update on the Transition to Phoebus at the Karlsruhe Institute of Technology

Wednesday 18 September 2024 13:20 (20 minutes)

The two accelerators KARA and FLUTE at the Karlsruhe Institute of Technology have been using Control System Studio as the main GUI for over ten years. We used the opportunity by the migration to Phoebus in order to set up a robust technical infrastructure with containers and a cluster setup aiming to provide a high availability environment. We are now in the process of transitioning the panels aiming for a the official switch in operations later this year. This presentation will report on the current setup, the panel migration and future plans.
