The testing infrastructure of EPNix

Wednesday 18 September 2024 16:50 (20 minutes)

An overview of the various tests and testing capabilities of EPNix, which is a project for packaging EPICS-related software using the Nix package manager.

These tests include:

- Testing EPICS IOCs and support modules
- Testing cross-compilation
- Testing EPICS-related software, such as:
 - Archiver Appliance
 - Phoebus Alarm
 - etc.
- Testing various network architectures
