

# Keynote Speaker – Christo Liebenberg (LIS Technologies Inc.)

## The future of nuclear power and the story of LIS Technologies Inc.

Worked as a Laser Enrichment Scientist and Leader for the last 30 years in South Africa, Australia and the US. He was also the former Laser Systems Manager for Silex Systems and GLE (Global Laser Enrichment). But, he became increasingly convinced that an alternative laser enrichment scheme was needed to make the technology viable on a Commercial scale. In 2013 he decided to resurrect the CRISLA laser enrichment process together with its inventor Dr Jeff Eerkens. In 2023 they co-founded LIS Technologies with Jay Yu, a capital markets specialist. Liebenberg is now leading CRISLA/LIST through a phased approach to commercialization.
